EDUKASYON SA PAGPAPAKATAO 9

Fourth Quarter: Concept Notes No. 15

I. CONTENT: Local and Global Demands

A. UNDERSTANDING LOCAL DEMAND

How can you find out what occupations the country needs? You can get information in many ways. The Department of Labor and Employment (DOLE) periodically releases reports that can help jobseekers realize what jobs are in-demand. Going through job ads posted on job sites (printed and online) can also give you an idea of what skills are needed by the current market. Keeping yourself updated through the news can also give you information in this regard, as the subject of in-demand jobs often comes out in the news.

The last two decades saw the rise of the Philippines as the go-to destination for Business Processing Outsourcing services.

Top 10 Emerging & Most In-Demand Jobs in the Philippines

1. Data Scientist
2. Application Development Analyst
3. Back End Developer
4. Full Stack Engineer
5. Sales Development Representative
6. Marketing Specialist
7. Recruitment Specialist
8. Administration Manager
9. IT Consultant
10. Accountant

B. UNDERSTANDING GLOBAL DEMAND

It would be ideal, then, to engage in occupations right within your country so that you can contribute to the building of the nation and the progress of your people.

Unfortunately, reality forces lots of Filipino workers to go abroad because of the lack of sustainable options at the local front. Jobs do exist in the Philippines, but many of these jobs cannot guarantee a sustainable income level that is enough to meet the needs of one's family.

Some OFWs are fortunate enough to find themselves in occupations that match their profession, but there are also others engaged in occupations that do not match their professions or are working in jobs which require skills lower than what they are actually qualified for. They settle these overseas jobs because of the higher pay abroad.

Top 15 World's Most in Demand Professions

1. Software engineers and developers
2. Electronics engineers
3. Mechanical engineers
4. Nurses
5. Doctors and medical practitioners
6. Civil engineers
7. Electrical engineers
8. Accountants
9. IT data analysts
10. Engineering managers
11. Surveyors
12. Secondary school teachers
13. Psychologists
14. Sales executives
15. Database and network professionals

II. OBJECTIVES:

- 1. Understand the local and global demands
- 2. Realize the importance of getting to know the demands of the job market both in local and global.
- 3. Identify jobs with high local and global demands.

III. ASSESSMENT (Activity #15 - 10 points)

If you could have your way, would you choose to work in the Philippines or abroad? Explain your answer.

IV. REFERENCE:

Growing in Character 9, 2nd Edition, Alvin G. Mejorada and Emma DC Saludsod, page 204-217.

V. GENERALIZATION:

Completing a course is not enough to guarantee an occupation that will give one a sustainable source of income. The need for particular jobs or occupations changes over time. Some jobs that were in demand years ago are no longer so important now, other jobs that were unheard of before are now becoming popular. It is important to keep oneself updated with regards to the demands of the current local and global job markets. This will help one understand what career or livelihood path will give him/her a higher possibility to have work and a sustainable source of income. Getting acquainted with the demands of the local and global market can increase one's chances of being in the kind of work environment that he/she is trained for.

VI. INSTITUTIONAL CORE VALUES:

Competence, Humility, Integrity, Equity, Fortitude and Stewardship
